CORE COMPETENCIES

- Data analysis and business intelligence
- SQL querying and relational data analysis
- Data extraction, transformation, cleaning, and validation
- KPI definition, monitoring, and management reporting
- Marketplace, sales, transaction, and customer analytics
- Dashboard and recurring report development
- Data quality checks and root-cause analysis
- Database design, query optimization, and performance monitoring
- RESTful API and payment-data integration
- Requirements gathering and stakeholder communication
- Analytical problem-solving and decision support
- Cross-functional collaboration with product and engineering teams

TECHNICAL SKILLS

Data Analysis

Exploratory, descriptive, trend, variance, cohort, funnel, and segmentation analysis; root-cause analysis; KPI development; ad hoc reporting

Data Preparation

Extraction, cleaning, transformation, validation, reconciliation, aggregation, deduplication, quality assurance

SQL & Databases

SQL, MySQL, PostgreSQL, MongoDB, joins, subqueries, CTEs, aggregate functions, views, data modeling, database design, query optimization

Business Intelligence

Power BI, Tableau, dashboard design, data visualization, KPI scorecards, management reporting, data storytelling

Excel & Reporting

PivotTables, PivotCharts, XLOOKUP/VLOOKUP, INDEX-MATCH, conditional formulas, charts, Power Query, recurring report automation

Python for Analytics

Python, pandas, NumPy, Matplotlib, Seaborn, Jupyter Notebook, data manipulation, basic statistical analysis

PROFESSIONAL SUMMARY

Data analytics and software engineering professional with 6+ years of experience turning operational, marketplace, sales, transaction, and customer data into reliable reports and actionable business insights. Strong background in SQL, MySQL, PostgreSQL, MongoDB, data extraction, data validation, KPI reporting, API-based data integration, query optimization, and backend systems. Experienced in working with cross-functional business, product, web, and mobile teams to translate reporting requirements into scalable analytics and software solutions. Combines analytical problem-solving with hands-on expertise in Laravel, PHP, Vue.js, React.js, RESTful APIs, and cloud deployment.

PROFESSIONAL EXPERIENCE

Lead Data Analyst & Backend Engineer

May 2024 - Present

TexBazar Limited — Dhaka, Bangladesh

- Analyze marketplace, product, buyer, seller, inquiry, and operational data to support business planning and platform decisions.
- Translate management and stakeholder questions into data requirements, SQL queries, KPI definitions, and recurring analytical reports.
- Prepare structured datasets and reporting views for monitoring marketplace activity, product performance, user engagement, and operational trends.
- Perform data cleaning, validation, reconciliation, and quality checks to improve the reliability of business and management reporting.
- Investigate anomalies and performance issues using database analysis, log review, and root-cause analysis.
- Design and optimize MySQL/PostgreSQL queries, database structures, and RESTful APIs for efficient data access and reporting.
- Collaborate with business, product, web, and mobile teams to integrate analytics requirements into platform features and workflows.
- Support server maintenance, deployment, system monitoring, and backend performance optimization.
- Present findings and technical recommendations in clear language for business and non-technical stakeholders.

Senior Data Analyst & Full-Stack Engineer

January 2021 - April 2024

Hishabee, Business Management Platform — Dhaka, Bangladesh

- Analyzed sales, payment, merchant, product, inventory, and application data to support product improvement and business decisions.
- Extracted and transformed operational data from relational databases and application APIs for recurring reports and ad hoc analysis.
- Developed SQL queries and reporting datasets to track business KPIs, transaction activity, merchant usage, and platform performance.
- Conducted data validation and reconciliation across web, mobile, and payment systems to identify inconsistencies and improve reporting accuracy.
- Worked with product, finance, and engineering stakeholders to define reporting logic, business rules, and data requirements.
- Built and maintained scalable web applications with Laravel, Vue.js, and React.js, ensuring dependable data capture and processing.
- Developed and optimized RESTful APIs used by web and mobile applications.
- Integrated bKash, Nagad, AamarPay, and SSLCommerz payment services and supported transaction-data troubleshooting.
- Improved database and application performance through query optimization, debugging, and backend enhancements.
- Supported Hishabee Business Manager, distribution management, e-commerce, service-booking, and payment-related products.

Laravel Developer

October 2019 - December 2020

Amazing Soft — Dhaka, Bangladesh

- Designed, developed, and maintained Laravel-based business applications and backend systems.
- Created database queries and application reports to support operational workflows and client requirements.
- Diagnosed data and application issues, optimized queries, and improved system performance and scalability.

TECHNICAL SKILLS (CONT.)

Programming & Integration
PHP 7/8, Laravel, JavaScript, Node.js, Express.js, RESTful APIs, JSON, payment API integration

Frontend
Vue.js, React.js, Livewire, HTML5, CSS3, Bootstrap, Tailwind CSS

Cloud & DevOps
AWS, DigitalOcean, Azure, Docker, Kubernetes, HAProxy, Ansible, Linux, SSH, CI/CD

Version Control
Git, GitHub, GitLab, Jira

EDUCATION

BBA, Marketing
Government Titumir College
2013 - 2019

Higher Secondary Certificate
Sayed Ahmed College, Bogura
2011 - 2013

Secondary School Certificate
Sayed Ahmed College, Bogura
2001 - 2010

LANGUAGES

Bangla — Native

English — Professional working proficiency

Hindi — Conversational

PROFESSIONAL EXPERIENCE (CONT.)

Laravel Developer January 2019 - September 2019
Softnio — Dhaka, Bangladesh

- Developed and maintained Laravel applications, backend modules, and database-driven features.
- Troubleshoot application and data issues and delivered scalable solutions aligned with client requirements.
- Supported database design, data processing, query optimization, and system debugging.

PHP & WordPress Developer April 2017 - November 2018
Universe IT — Dhaka, Bangladesh

- Developed responsive websites, custom themes, plugins, and CMS functionality.
- Managed structured website content and improved performance, reliability, and user experience.

WordPress Developer January 2016 - March 2017
Shahara IT Development — Dhaka, Bangladesh

- Designed and implemented WordPress features and managed CMS-based websites.
- Optimized site performance and maintained dependable content and data workflows.

DATA ANALYTICS PORTFOLIO

TexBazar Marketplace Performance Analytics
Objective: Help management understand marketplace activity and identify areas needing operational attention.

- Combined product, seller, buyer, inquiry, and user-activity data into structured reporting datasets.
- Wrote SQL queries to monitor active users, new registrations, product listings, buyer inquiries, seller response activity, and category-level trends.
- Designed KPI views for marketplace growth, engagement, product availability, and buyer-seller activity.
- Cleaned duplicate and incomplete records and set up validation checks before management reporting.
- Used findings to support product prioritization, seller follow-up, and marketplace operations.

Tools: SQL, MySQL/PostgreSQL, Excel/Power BI, RESTful APIs

TexBazar Daily Yarn Market Analysis
Objective: Organize daily yarn-market information and make price movements easier to review.

- Structured daily yarn price records by yarn type, count, supplier, market, and reporting date.
- Compared current and historical prices to identify price changes and short-term market trends.
- Prepared summary tables and visual reports for management and market-update content.
- Applied data-quality checks to find missing, duplicated, or inconsistent price records.
- Created a repeatable reporting structure for daily and weekly yarn-price analysis.

Tools: Excel, Power Query, SQL, Power BI

TexBazar Buyer-Seller Funnel Analysis
Objective: Understand how activity moves from registration and product discovery to inquiry and follow-up.

- Defined funnel stages for registration, profile completion, listing, product view, inquiry, seller response, and follow-up.
- Built SQL datasets to compare activity across user types, product categories, and reporting periods.
- Identified funnel drop-off points and inactive records needing operational follow-up.
- Prepared dashboard views and management summaries to support user-engagement decisions.

Tools: SQL, Power BI/Tableau, Excel

SELECTED PROJECTS

TexBazar B2B Textile Marketplace
Marketplace for textile and yarn buyers and sellers
[texbazar.com](#)

Hishabee Business Manager
Business-management platform for small businesses

DATA ANALYTICS PORTFOLIO (CONT.)

Hishabee Merchant Sales and Business Performance Dashboard
Objective: Provide a consolidated view of merchant activity, sales performance, and product usage.

- Extracted merchant, sales, product, inventory, and application-usage data from relational databases and APIs.
- Created SQL reporting datasets for sales trends, active merchants, order activity, product movement, and platform usage.
- Segmented merchants by activity and transaction behavior to support product and operational analysis.
- Developed KPI views and recurring summaries for product, finance, and management stakeholders.
- Reconciled source data across web and mobile systems before publishing reports.

Tools: SQL, MySQL/PostgreSQL, Excel, Power BI/Tableau, RESTful APIs

Hishabee Payment Transaction and Reconciliation Analysis
Objective: Improve visibility into payment processing and investigate transaction discrepancies.

- Analyzed transaction data from bKash, Nagad, AamarPay, and SSLCommerz integrations.
- Compared internal transaction records with gateway responses to find pending, failed, duplicated, or mismatched payments.
- Built SQL queries and reconciliation reports for transaction status, payment channel, date, merchant, and order reference.
- Supported root-cause investigation of API, callback, and database issues affecting transaction records.
- Shared exception findings with finance, product, and engineering teams for resolution.

Tools: SQL, Excel, RESTful APIs, JSON, Laravel, MySQL/PostgreSQL

Hishabee Inventory and Product Movement Analysis
Objective: Help merchants and internal teams understand product movement and inventory conditions.

- Structured sales and inventory data to review opening stock, purchases, sales, returns, adjustments, and closing stock.
- Created product-level reports to identify fast-moving, slow-moving, and low-stock items.
- Investigated stock discrepancies by tracing transaction and adjustment records.
- Prepared reusable SQL queries and reporting views for merchant-level and period-based analysis.

Tools: SQL, Excel/Power BI, MySQL/PostgreSQL

EXAMPLES OF ANALYTICAL WORK DELIVERED

- Turned a management request such as “Which marketplace categories are receiving the most buyer interest?” into defined KPIs, SQL queries, category comparisons, and a concise decision-ready report.
- Investigated mismatched payment records by comparing the order table, internal transaction table, API response, and gateway callback status, then documented the exceptions for corrective action.
- Improved slow operational reports by reviewing joins, filters, indexes, and query execution patterns, then restructuring the query for faster data retrieval.
- Created reusable reporting datasets instead of repeated manual extracts, giving stakeholders one consistent source for recurring KPI reviews.
- Validated reports by checking totals, null values, duplicate records, date ranges, and source-system logic before sharing results.
- Explained analytical findings to non-technical stakeholders using clear summaries, tables, trend visuals, and recommended next actions.
